GH8 Engine

GH8TA357PS

263kW(357PS) / 2,200rpm

1,428Nm(145.6kg·m) / 1,200-1,600rpm

The GH8TA is an in-line six-cylinder diesel engine equipped with a turbocharger and intercooler. The engine produces 357 PS and 1,428 Nm of torque. The engine meets Japan's pPNLT exhaust emissions requirements, which is equivalent to the Euro 6 standards. The engine's functions are controlled electronically. Fuel injection takes place using common rail technology.

The engine has a particularly wide torque range, which means that it is possible to stay within the economy rev band easily and with minimal gear changing. The engine has a variable geometry turbocharger, which provides excellent torque from low revs, resulting in a quick response to the accelerator and enhanced driveability at low speeds.
